

NEW from DA Systems & Barcode Products

A managed, fully bespoke, mobile data capture solution - perfect for service based organisations.

NX Framework is a complete end-to-end, bespoke mobile-data solution – including hardware, software, maintenance, data hosting, management and airtime – all under a single managed service.

This flexible offering gives service-based companies, like yours, the freedom of experiencing bespoke applications that can be developed and delivered to you extremely rapidly, allowing you to continue to do what you do best – deliver your services to your customers.

The NX Framework solution is delivered as a managed service to reduce your costs and provide all the benefits of security, resilience and support - alleviating the need for upgrades, extra resources or new infrastructure. And, as well as fully bespoke software and real time data transfer, our single managed service provides you with impartial & knowledgeable advice about the most suitable mobile devices for your business, saving you time and resources.

Email or call us for more information on 08008 560 588.

NX Framework enables not just tailored software, but fully bespoke applications to be developed very RAPIDLY for any business, for any job role, for any Windows Mobile device.

Send me the NX Framework Executive Summary

Benefits

For Your Customers

You can keep your customers informed at every stage - simply, effectively and in real time

Installation/repair disputes eliminated through barcode, RFID & sign-on-screen technology

For Mobile Workers

Routes and schedules can be optimised, saving your team time and money

NX Framework enhances clarity of roles and responsibilities through effective data transfer & sharing

For Your Business

NX Framework gives you access to accurate information straight from the field - enabling your management team to analyse calls, plan a more effective work force operation and recognise any repair patterns or repetitive faults
